

Richard J. Ablin, University of Arizona College of Medicine, Tucson, AZ, USA; Malcolm D. Mason, University of Cardiff, UK (Eds.)

Metastasis of Prostate Cancer

This volume brings together the key research issues in clinical and laboratory science relating to metastasis in prostate cancer. It is especially suitable for those in the field, whether physicians and/or scientists, and whether in active research or in training, who wish to broaden their understanding, with regard to their own discipline, and also to another. It is also a resource for those whose research is in metastasis, but in diseases other than prostate cancer. The intention of this volume is to help to empower those who seek to further exploit the potential for translational research in this field. Written by a team of internationally recognised experts, the scope ranges from the most fundamental aspects of the molecular biology of metastasis, to the patient in the clinic. The therapeutic approaches range from conventional drug design to immunogene therapy. Prostate cancer is an area of intense research effort, and this book provides a window on contemporary research in this important area.

Contents:

1. Introduction: Metastasis as a Therapeutic Target; *Richard J. Ablin and Malcolm D. Mason.*
2. The Natural History of Prostate Cancer; *David F. Penson and Peter C. Albertsen.*
3. The Search for Genes Which Influence Prostate Cancer Metastasis: A Moving Target?; *Norman J. Maitland.*
4. Polyunsaturated Fatty Acids and Prostate Cancer Metastasis ; *Wen G. Jiang.*
5. Role of Prostaglandin Synthesis and Cyclooxygenase-2 in Prostate Cancer and Metastasis; *Alaa F. Badawi.*
6. Cell Cycle Regulation; *Ruchi M. Newman and Bruce R. Zetter.*
7. Epithelial-Mesenchymal Molecular Interactions in Prostatic Tumor Cell Plasticity; *Mary J.C. Hendrix, et al.*
8. Orthotopic Metastatic Mouse Models of Prostate Cancer; *Robert M. Hoffman.*
9. β -Catenin, its Binding Partners and Signalling Mechanisms: Implications in Prostate Cancer; *Gaynor Davies, et al.*
10. Hepatocyte Growth Factor/Scatter Factor and Prostate Cancer Metastasis; *Gaynor Davies, et al.*
11. Matrix Degradation in Prostate Cancer; *Michael J. Wilson and Akhouri A. Sinha.*
12. The Biology of Bone Metastases from Prostate Cancer and the Role of Bisphosphonates; *Noel W. Clarke and Herbert A. Fleisch.*
13. Non-Steroidal Anti-Androgen Use as Part of Combined Androgen Blockade Therapy for Metastatic or Locally Advanced Prostate Cancer: a Review of the Evidence on Efficacy and Toxicity, *Mike Shelley, et al.*
14. Strategies for the Implementation of Chemotherapy and Radiotherapy; *Paula Scullin, et al.*
15. Immuno-gene Therapy for Metastatic Prostate Cancer; *Takefumi Satoh, et al.*
16. Distilling the Past – Envisioning the Future; *Richard J. Ablin and Malcolm D. Mason*
